

INTERMED BIOMEDICAL JUMP TEAM

coming to your rescue when you need an extra hand.

What can the Jump Team do for us?

- General Biomed support.
- Help in preparation for Joint Commission review.
- Inventory acquisition.
- Catch up on a backlog of PM's.
- Assist checking in large volume equipment purchases or facility moves.
- Coverage during education or training programs, conventions, medical leave, vacations, etc.
- Custom programs tailored to your specific needs.

What does the Jump Team cost?

- \$65-100 per hour without expenses.
- \$1,000-1,200 per day with expenses.
- One week minimum contract.
- Prices depend on length of term, location, level and expertise of engineer required.

Why should we hire the Jump Team?

- To get the experience and expertise of an entire team of over 80 engineers instead of being limited to the knowledge and skill set of one FTE.
- To eliminate the obligation that comes with employing additional service engineers: InterMed is responsible for the insurance, benefits, taxes, training, liability, etc. of the employees.
- For turnkey experts: specialists are available for things like dialysis or pneumatic tube systems and each technician is equipped with a laptop and trained on inventory acquisition.
- For a range of experience and resumes: CBET through entry level technicians are available.
